DAY HOSPITALS

B-BBEE Status - Level 2

CURE DAY HOSPITALS

The **best care** in one day!

Message From Our
GROUP CHAIRMAN

Cure Day Hospitals operates as a network of day hospitals across the country, all of which are members of the Day Hospital Association. Our facilities cover a broad spectrum of medical disciplines and procedures, including Dermatology, Ear Nose & Throat (ENT), Gastroenterology, General Surgery, Gynaecology, Ophthalmic Surgery, Maxillo Facial and Oral Surgery, Orthopaedic Surgery, Plastic and Reconstructive Surgery, Dental, and Urology.

Advancements in surgical technology, anesthesia, and minimally invasive techniques have enabled safe execution of procedures within the day hospital setting. As medical innovation progresses, an increasing number of procedures will be conducted in day hospital theaters. Research from the United States and the United Kingdom has demonstrated that over 70% of all surgical procedures can be successfully performed in a day hospital environment.

Key Benefits of Day Hospitals:

- **No Overnight Stay:** Patients are admitted, undergo surgery, and are discharged on the same day.
- **Child-Friendly:** Day hospitals provide an ideal option for children requiring same-day surgery, eliminating the trauma of overnight stays and maintaining a friendly environment for children and their parents.
- **Affordable:** With all procedures scheduled and no overnight stay, day hospitals offer cost-effective healthcare solutions.

We are actively pursuing public-private partnerships as part of our commitment to making healthcare a universal right. Our goal is to collaboratively address healthcare challenges for the betterment of all.

Mr Vusi Mahlangu
Chairman

Message From Our
CHIEF EXECUTIVE OFFICER

Cure Day Hospitals is a vibrant and dynamic company that has successfully established a strong reputation in the market. Our rapid expansion is evident, with thirteen (13) operational hospitals expected by the end of 2024, and additional plans underway to further broaden our national footprint.

As leaders in the South African same-day surgery market, our brand is firmly established, and we continue to grow. Through innovative initiatives, we are dedicated to delivering a positive experience for all our stakeholders.

Recognizing that our most valuable asset is our staff, we acknowledge that our impressive facilities are complemented by the competence of our team, contributing to the positive feedback received from patients, doctors, and medical aids. Additionally, we remain steadfast in our commitment to community well-being through pro-deo surgery and various outreach projects. In this year alone, we have assisted over 1600 patients with free surgeries, and we are committed to sustaining and expanding such initiatives in the future.

Bert Von Wielligh
CEO

MISSION AND VISION

Our Mission

Our Mission is to become the preferred provider of day surgery facilities in South Africa, providing quality customer focussed services to medical practitioners, patients and shareholders. Establishing and maintaining strong relationships with medical doctors and other allied communities.

Our Vision

To be the leading, trusted and profitable day hospital group in South Africa.

CURE VALUES

Compassion

Caring with empathy and integrity through adhering to professional standards and high moral principles.

Unity / Teamwork

Blending skills of individual staff members and valuing the contributions of all.

Respect

For the rights, beliefs and choice of every individual.

Excellence

Innovation and achievement of the highest standards by continually measuring and improving outcomes.

CURE DAY HOSPITALS' **BOARD MEMBERS**

FROM LEFT TO RIGHT:
Mr K. Pretorius, Mr J. Prinsloo, Dr I. Tayob, Dr A. Roux, Dr O. Shimange, Dr P. Leuschner, Dr M. Matima, Mr A. Millar, Mr B. von Wielligh, Mr V. Mahlangu.

CURE DAY HOSPITALS' **EXECUTIVE TEAM**

FROM LEFT TO RIGHT:
Albert de Jongh (New Business Development Manager), Mmamoko Lamola (Group HR Manager), Bert von Wielligh (Chief Executive Officer), Sorita Van Tonder (Group Marketing Manager), Johan Nel (Chief Financial Officer), Nicola van der Westhuizen (Chief Operating Officer).

WHAT ARE THE **BENEFITS** TO ME AS A DOCTOR?

We know how valuable your time is and the well being of your patients. We have the following benefits for you as a doctor:

- Minimal delay in theatre start times.
- Availability of theatre time as planned.
- Consistent, permanent theatre staff.
- Low risk of hospital acquired infections.
- Comfortable and friendly environment.
- Investment in latest Day Surgery technology, especially minimally invasive surgery.
- Enhanced reimbursement paid by some funders.

WHAT ARE THE **BENEFITS** TO ME AS A PATIENT?

A day hospital is a facility where surgery is performed and patients are discharged on the same day. Surgical procedures are performed using modern technology and minimally invasive surgical techniques.

This expedites recovery and reduces time spent in a hospital. Specialists perform only minor procedures in a safe equipped environment. The purpose of day surgery is to keep costs down, and maximise time efficiency and planning as there is no scheduling for an overnight stay. This approach to surgery is highly cost effective as patients do not stay overnight- therefore no nursing is required after hours. This makes the overall experience unique and rewarding for all the parties involved.

WHY CHOOSE A DAY HOSPITAL

No overnight stay | Shorter recovery time | Planned admissions & discharges convenient to patients | Reduces anxiety associated with surgery | Lower cost | Child friendly environment | Benefits for medical aid & private patients.

SUSTAINABILITY

Sustainability at Cure Day Hospitals
At Cure Day Hospitals, sustainability and transformation are at the core of our values. We are proud to have achieved a Level 2 B-BBEE status and are committed to maintaining and improving this rating. In 2024, we were also recognised as a Top Gender Employer, reflecting our dedication to being an equal opportunity employer.

Quality and Accreditation
We are committed to excellence in patient care. Ten of our 12 hospitals are now accredited by the Council for Health Service Accreditation of South Africa (COHSASA). This achievement highlights our dedication to providing safe, high-quality care and continuous improvement in healthcare standards.

Environmental Responsibility
Sustainability is key to our operations. We are making use of solar systems at 10 of our 12 hospitals, which significantly reduces our carbon footprint and ensures uninterrupted care during power outages. This initiative reflects our commitment to environmental stewardship and operational efficiency.

Waste Management and Recycling
Cure Day Hospitals partners with an experienced medical and pharmaceutical waste management company, enabling the Group to meet the legal requirements of a comprehensive healthcare waste plan, designed in accordance with SANS 10248-1: 2008, "Management of Healthcare Risk Waste from Healthcare Institutions." This ensures the proper and appropriate management and disposal of all medical and pharmaceutical waste.

We also prioritise recycling and re-use. We actively recycle general waste and have established programs to donate non-hazardous clinical equipment and linen. Additionally, we partner with a recycling group that repurposes empty intravenous bags and oxygen masks into school shoes, supporting both environmental sustainability and community welfare.

Our Promise
Cure Day Hospitals is committed to integrating sustainability into our core practices, ensuring we deliver exceptional patient care while actively protecting the environment and supporting our community.

Cohsasa

Quality improvement and accreditation

TOP WOMEN
CERTIFIED 2024
TOP GENDER EMPOWERED COMPANY

B-BBEE LEVEL 2 CONTRIBUTOR

CORPORATE SOCIAL INVESTMENT (CSI)

Cure Day Hospitals is deeply committed to supporting the communities in which we operate. Our dedication to making a positive impact is evident through our various CSI initiatives. One of our major projects has been a school shoe donation drive, where we have donated over 1300 pairs of school shoes made from non-hazardous recycled materials sourced from our hospitals to learners in need.

Beyond material donations, Cure Day Hospitals have made a significant contribution to same-day surgery access in our communities. In this financial year (2024), we have assisted approximately 1600 patients with much needed surgical procedures free of charge, demonstrating our commitment to improving the quality of life for individuals who might otherwise be unable to afford such care. Additionally, we offer CSI surgeries at no cost and assist with ad hoc pro bono cases, providing surgical interventions to community members in need.

We have had the privilege of partnering with several reputable organisations in these efforts, including African Synergy Health, Smile to Joy, Right to Sight, and Operation Healing Hands among others. These collaborations have been instrumental in reaching and supporting those in need, enabling us to extend our services and impact more broadly.

Through these initiatives, Cure Day Hospitals continues to strive toward making a lasting and meaningful difference in the lives of individuals and our communities.

SKILLS DEVELOPMENT

Cure Day Hospitals is committed to making a meaningful difference in the health sector and has in 2024, proudly sponsored six unemployed nursing students from Arwyp to complete their studies.

We believe that there is a need to develop our nurses of tomorrow and therefore Cure Day Hospitals proudly provided support to ten (10) 3rd and 4th year nursing students from the Stellenbosch University to participate in didactic learning and simulations activities related to healthcare systems, advocacy, policy impact and policy change during a visit to James Madison University in Virginia in the USA.

Additionally, we care about the youth of South Africa and strongly believe that we have an essential part to play in developing the leaders of tomorrow. Cure Day Hospitals enrolled 50 unemployed youth for a 12-month learnership programme. Of the 50 learners, 10 of the learners are disabled. These learners are enrolled with Skills Development Corporation in Gauteng and the Western Cape. This learnership requires incumbents to receive practical training, some of the learners will be hosted at Group or our hospitals for their practical experience.

CURE DAY HOSPITALS -

MEDKIN

The facility offers same-day surgical procedures in the following disciplines:

- Dental
- Dermatology
- Ear, Nose and Throat (ENT)
- Gastroenterology
